Step 1: Inspect and Register Your Test Kit
Once you have received your test kit, complete the following steps:

1. Inspect your test kit to ensure all components are included: collection tube with funnel, tube cap, biohazard bag with absorbent sheet, original shipping box with attached prepaid return shipping label.

2. On the day you collect your saliva specimen, go to www.register.azova.com to register your test kit ID barcode. This will link your specimen with your order and test results. Your test report will show the collection date as the date you register your kit.

3. Complete the Information Card on the perforated edge of the instruction card and place in the document pouch of the biohazard bag.

   IMPORTANT: Read complete instructions prior to providing a specimen.

Step 2: Collect Your Saliva Sample
You may complete your specimen on your own or under supervision with a physician or pharmacist. Avoid collecting and sending back samples on the weekend.

1. IMPORTANT: Do not eat, drink, smoke, or chew gum 30 minutes before collecting your saliva specimen. Wash your hands thoroughly for 20 seconds then dry your hands before starting the collection.

2. Open your kit and place all the contents on a clean, dry surface. Remove the saliva collection device from its packaging and collect your specimen.

   1. Spit until the amount of liquid saliva (not bubbles) reaches the fill line.

   2. Hold the tube upright and close the funnel lid by firmly pushing the lid until you hear a loud click. The liquid in the lid will be released into the tube.

   3. Hold the tube upright and unscrew the funnel from the tube. This step is very important.

   4. Use the small cap to close the tube tightly. Discard the funnel.

   5. Shake the capped tube for 5 seconds.

   6. Place the tube into the biohazard bag and seal the bag.

   7. Complete the Information Card on the perforated section of the instruction card and place in the document pouch of the biohazard bag.

Information Card

IMPORTANT: Complete the following. Detach and insert this card into the document pouch of the biohazard bag prior to shipping your kit.

First Name

Last Name

Phone #

Date of Birth (mm/dd/yyyy)
Step 3: Send Back Your Saliva Sample

1. IMPORTANT: Wash your hands thoroughly for 20 seconds again, then dry your hands before placing the biohazard bag into the return shipping box. Place the biohazard bag into the original shipping box with the prepaid return shipping label attached to it and seal the box flap by peeling the adhesive strip.

2. Wash your hands again and deliver the sealed, prepaid, pre-addressed shipping box to the appropriate carrier’s drop box or location. IMPORTANT: Your sample must be shipped within 24 hours of collection. Do not deliver sample to a drop box on the weekend.

3. IMPORTANT: Wash your hands thoroughly for 20 seconds again, then dry your hands.

Step 4: Results Are Ready Within 72 Hours Once the Lab Receives the Kit

1. IMPORTANT: Wash your hands thoroughly for 20 seconds again, then dry your hands before placing the biohazard bag into the return shipper. Place the biohazard bag into the original shipping box with the prepaid return shipping label attached to it and seal the box flap by peeling the adhesive strip.

2. Wash your hands again and deliver the sealed, prepaid, pre-addressed shipping box to the appropriate carrier’s drop box or location. IMPORTANT: Your sample must be shipped within 24 hours of collection. Do not deliver sample to a drop box on the weekend.

3. IMPORTANT: Wash your hands thoroughly for 20 seconds again, then dry your hands.

Your results will be sent to you electronically through AZOVA. You will receive an email and SMS with a link to view your results on the AZOVA app or website.

IMPORTANT: You must register your barcode at www.register.azova.com. We recommend you take a photo or copy of the barcode for your records.

• This test has not been FDA cleared or approved.
• This test has been authorized by FDA under an EUA for use by the authorized laboratories.
• This test has been authorized only for the detection of nucleic acid from SARS-CoV-2, not for any other viruses or pathogens.
• This test is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.
